## **EUROVENT CERTITA CERTIFICATION EXTENDS ITS EUROPEAN CERTIFICATION PROGRAMME FOR HEAT PUMPS**

Paris, 24 January 2017

After the launch of the programme early 2015, Eurovent Certita Certification is pleased to announce the extension of its European wide certification programme for Heat Pumps, to additional technologies – Air-to-air Heat Pumps (reversible Air Conditioners), Variable Refrigerant Flow Systems, Rooftop units and Liquid Chilling Packages – and to units above 100 kW.

Each range will be certified according to the relevant certification reference document related to the programme dedicated to each sub-category, under the Eurovent Certified Performance Mark.

In practice, all certified European Heat Pumps will be displayed on our website, just like for any other programme. End users and decision makers will have access to a complete and extensive choice of certified HP solutions, covering all segments, from the smallest residential to commercial as well as industrial applications. Customers will be proposed all eligible product ranges available on our website under the two different programmes, the original ECP one and the European Heat Pump one. Dedicated European Heat Pump certificates will be delivered during the first quarter of 2017.

Thus, any of the Heat Pump solutions will take advantage of our ongoing marketing and communication effort dedicated to certify European Heat Pumps. In addition to a recent 14-months advertising campaign displayed in 14 magazines in 8 countries all over Europe, the European Heat Pump programme along with all Eurovent Certified Performance programmes will benefit in 2017 from a round of meetings with local authorities of specific countries for local recognition of our certification.

Dedicated presentation will be organised during ISH exhibition, planned on Thursday 16 March 2017.

Certified product lists and certified product performances are available at [www.eurovent-certification.com](http://www.eurovent-certification.com) - [www.certita.org](http://www.certita.org)
